Experience

Software Engineer – Voya Financial, New York

[June 2023 – Present]

- Developed 15+ REST APIs using Java/SpringBoot, improving system integration by 30% and optimizing 10+ chatbot workflows with Genesys Architect and Google DialogFlow.
- Resolved 3 critical JavaScript defects, that directly facilitated the acquisition of 2 new enterprise clients, earning an Outstanding Contributions Award for significant contributions to project success.
- Managed 20+ production deployments using GitHub, Jenkins, OpenShift, and XLD, ensuring zero downtime and resolving 100% of issues within the maintenance window, leading to a 12% increase in CSAT and a 14% improvement in resolve rates.
- Promoted to a new cross-functional team to foster synergy between Genesys and Salesforce, balancing dual-team responsibilities and consistently meeting sprint deadlines.
- Mentored interns and new hires through knowledge transfer sessions and comprehensive documentation, ensuring smooth onboarding and alignment with team standards.

Assistant Software Engineer – New York Institute of Technology, New York

[September 2022 – May 2023]

- Built a scalable expense tracker with React, Node.js, Python, MongoDB, and Kafka, processed 1M+ real-time transactions, optimized with Redis caching (40% faster response) and offline PWA support for seamless use.
- Integrated AI-driven analytics, using LSTM and Isolation Forest models for 85% accurate expense forecasting and 99% precision in fraud detection, plus NLP-based categorization (92% accuracy) that cut manual input by 70%.
- Designed interactive analytics dashboards with Recharts, delivering 15+ customizable visualizations of spending trends and ML-driven budget suggestions, helping users make data-driven financial decisions.

Software Developer Intern – Voya Financial, New York

[June 2022 – August 2022]

- Accelerated the cloud migration process with REST API development in Java and SpringBoot, and API testing in SoapUI.
- Designed and developed a React.js dashboard to monitor and analyze 10,000+ user interactions monthly, leading to an 8% improvement in resolve rate and a 9% increase in customer satisfaction by optimizing response strategies.

Skills

Languages – Python, JavaScript, Java, SQL, C, C++, HTML, CSS

Software Tools & Frameworks – Visual Studio, Jupyter Labs, Android Studio, Git, GitHub, React.js, Angular.js, Node.js, Jest, Mocha, Django, REST, SpringBoot, OpenShift, Jenkins, XLDeploy, SoapUI/Postman, StreamLit, Microsoft Office, Tableau

Database & Cloud Technologies – MongoDB, Google Firebase, Google DialogFlow, MySQL, AWS, Genesys Cloud, Salesforce.

Professional Skills – Agile, Scrum, leadership, team management, innovation.

Projects

AMPortfolio [React, Node.js, Redux, APIs, Google DialogFlow, AWS]

- Designed a responsive React portfolio, showcasing projects, work experience, and skills interactively, with a seamless user interface powered by Redux for efficient state management.
- Developed a backend system with Node.js, delivering 100+ real-time messages from the UI directly to the inbox.
- Integrated an intelligent chatbot using Google DialogFlow with 30+ intents, assisting users with FAQs and navigation for enhanced interaction and user experience.

EZInterview [React, Node.js, Express.js, MongoDB, Twilio, APIs, AWS]

- Engineered a real-time video platform with React and Twilio, enabling video call scheduling for over 500 users, secure authentication with JWT, and dynamic interview scheduling through CRUD operations and 10+ RESTful API integrations.
- Developed 15+ REST APIs using Node.js, optimizing data retrieval and management for 1,000+ users with a MongoDB backend, ensuring efficient storage and seamless communication between frontend and backend applications.
- Deployed on AWS with 2 EC2 instances, 1 RDS database, and S3 for 100+ media files, ensuring high scalability.

Benefits Hub [Java, APIs, SpringBoot, Genesys, Git, CI/CD]

- Developed 8 REST APIs in Java, integrating data from 4 backend services to streamline the data retrieval.
- Architected 5+ intelligent chatbot workflows in Genesys Cloud, using advanced business logic for efficient query resolution.
- Leveraged GitHub and Jenkins for CI, OpenShift for deployment, and XLD for automated CI/CD across 4 environments.
- Deployed with zero downtime, ensuring 100% issue resolution and a 12% boost in customer satisfaction on *Voya PAL*.

Education

MS in Computer Science – New York Institute of Technology, New York

GPA: 3.8/4.0

[September 2021 – May 2023]

- Two-time Runner-Up – ETIC Data Science Hackathon (2021 & 2022).

Bachelor's in Electronics Engineering - University of Mumbai, Mumbai

GPA: 3.6/4.0

[June 2017 – May 2021]
